

We do have a published price list, but for a more accurate quote please bring your instrument in for a **FREE estimate** while you wait. Below is a selection of prices as a guide.

Woodwinds

Playing Condition consists of regulating, adjusting, and lubricating the instrument, and replacing key corks as needed (assuming all pads are sealing properly).

- ~Student Flute & Composition Clarinet repairs start at \$37.00.
- ~Open Hole Flute repairs start at \$66.00
- ~Wood Clarinet repairs start at \$58.00
- ~Simple System Oboe repairs start at \$51.00
- ~Alto Sax repairs start at \$66.00.
- ~Tenor Sax repairs start at \$77.00

Most woodwind repairs need pads and/or corks replaced in addition to a playing condition. Pads and corks are extra depending on the type of pad/cork.

Repad consists of replacing all of the pads and key corks as needed. So that the instrument will look as it does now but sounds like a brand new instrument. Any tone hole or body work may be extra. Other shops may call this a mechanical overhaul.

- ~Student Flute repads start at \$218.00
- ~Open Hole Flute repads start at \$297.00
- ~Composition Clarinet repads start at \$203.00
- ~Wood Clarinet repads start at \$256.00
- ~Alto Sax repads start at \$501.00
- ~Tenor Sax repads start at \$619.00

Some woodwind repads need tenon, headjoint, or neck corks replaced in addition to the pads. Corks are extra depending on the type of cork.

Overhaul consists of buffing and polishing the body and keys, replacing all of the pads, and all of the corks (including tenon, headjoint, and neck corks), so that the instrument will look and sound like a brand new instrument (as long as all of the plating is still intact). Saxophone overhaul prices include refinishing.

- ~Student Flute overhauls start at \$297.00
- ~Open Hole Flute overhauls start at \$420.00
- ~Composition Clarinet overhauls start at \$275.00
- ~Wood Clarinet overhauls start at \$420.00
- ~Alto Sax overhauls start at \$1017.00
- ~Tenor Sax overhauls start at \$1089.00

Woodwinds that have been in storage not being used for months to years may have been infiltrated with insects. These insects are attracted to the felt in the pads. They may make their home there or just have a bite and leave, but either way it is always best to replace the case once an overhaul is complete. By doing this we eliminate the chance they have to enjoy a fresh Thanksgiving dinner!

Brass
